DETAILED ACTION

1. Claims 5 and 15 are pending in the present application.

Drawings

2. The drawings were received on November 12, 2003. These drawings are approved.
3. The drawings are objected to because descriptive textual labels are needed for elements 154 and 146 note figure 6. Note MPEP 37 CFR 1.84(o). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
4. The drawings are objected to because of the partial view of element 106 note figure 6. See 37 CFR 1.84(u). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 2177

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 5 and 15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 and 11-15 of U.S. Patent No. 6,496,821 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is well settled that omission of elements and their functioning is obvious expedient if the remaining elements perform the same function as before. See *In re Karlson* 136 USPQ 184 (CCPA 1963).

Regarding claim 5, of the present invention "In a data processing environment having a user terminal with a user-id for generating a service request for access to a data table responsively coupled to a data base management system having a data base containing a first data table and containing a second data table ... a security profile corresponding to said user-id whereby said data base management system permits said user terminal to access said first table ..." [note claim 1 and dependent claims 2-5 US Patent 6,496,821 B1 col. 17 line 51 through col. 18 line 22]. The present claimed invention simply states access to a data table, whereas the US Patent assigned to Gebauer et al. cites access to a first data column within a first data table, the second being more specific or narrow in scope as to how the access is being performed. It

would have been obvious to one of ordinary skill at the time of the invention to have omitted reference to the column in within the table because the improvement would essentially perform the same function.

7. The limitation of claim 15 parallels claim 5, and can be referenced in claims 11-15 of US Patent 6,496,821B1; therefore it is rejected under the same rationale as stated supra.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
